## SUMMARY

---

As a Senior Associate Management Consultant at KPMG, I help organizations make confident decisions in complex environments where data, uncertainty, and competing perspectives collide. Combining strong analytical and communication skills, I build models to analyze complex datasets and uncover key drivers. I translate insights into clear decision support for leaders and lead inclusive workshops that surface different perspectives, build shared understanding, and help teams commit to decisions that last and benefit the wider organization.

With 3.5+ years of management consulting experience, I've worked on transformation and operational improvement initiatives across both private and public sectors. I am recognized for structured communication and strong stakeholder management, helping cross-functional and international teams align around data-driven decisions and execute them in practice.

## WORK & LEADERSHIP EXPERIENCE (SELECTED)

---

**Management Consultant, KPMG Sweden** **08/2022 – Ongoing**

*The Management Consulting team is a part of the Advisory department in KPMG Sweden, working with a broad range of projects.*

- Consulting experience from both strategic and implementation projects within the automotive and industrial manufacturing sectors.
- Have consistently exceeded expectations, receiving high grading in all calibrations during the entire employment.
- Promoted to Senior Associate during the fall of 2024.

**Selected Consulting Experience**

Large transformation engagements:

- Assisted in the design and implementation of a Buy-Sell operating model for the European division of a Tier-1 automotive parts manufacturer. Worked within the supply chain and operations workstream to design processes for production plants within the new operating model and develop the implementation plan for the go-live phase. Provided support in managing all direct and indirect suppliers. Conducted analysis to identify additional optimization opportunities.

Organizational optimization engagements:

- Supported in reviewing the costs of support functions for a large professional service firm, conducting analyses and developing recommendations for cost reduction measures. Primarily focus on office footprint, spend analyses, and personnel costs.

Corporate development engagements:

- Led a project developing and evaluating strategic expansion plans for a market expansion for an education provider. Evaluated multiple future scenarios and corresponding budget results for the expansion.

**Student Ambassador, KTH Royal Institute of Technology** **10/2020 – 06/2022**

*KTH employs students to engage with and market the university to prospective students.*

- Represented KTH and the Vehicle Engineering program to senior high school students both at visits to KTH and by visiting schools.

**Teaching Assistant – Corporate Finance & Industrial Management, KTH Royal Institute of Technology** **08/2021 – 01/2022**

*KTH employs high-performing students to teach alongside the main professor in courses.*

- Taught lessons in courses of Corporate Finance and Perspective on Industrial Management at the Institution for Industrial Management at KTH. Responsible for both teaching and grading of exams and assignments.
